**Flight '24: National Level Technical Symposium and Aero Expo**

We are pleased to announce that the Association of Aeronautical Engineers of Anna University, MIT Campus, is organizing a national level technical symposium, “Flight”. As part of the symposium, we will be hosting an Aero Expo where leading aviation companies and drone companies will showcase their advancements in technology.

The Aero Expo will be an excellent opportunity for professionals, enthusiasts, and students to witness the latest technological advancements in aviation and drone industries. With the participation of some of the leading companies in the field, we aim to provide a platform for people to learn, interact, and network.

One of the highlights of the Aero Expo will be the keynote address by a prominent figure in the aviation industry. This keynote address will offer insights into the current state of the industry, the latest developments, and the future of aviation and drone technology.

In addition to the exhibits and demonstrations, the Aero Expo will also host various interactive sessions, including panel discussions, workshops, and Q&A sessions with industry experts. These sessions will provide an opportunity for visitors to interact with leading professionals and learn more about the industry.

The Aero Expo will be a great learning opportunity for students interested in pursuing careers in the aviation and drone industries. They will have a chance to interact with industry professionals, learn about the latest advancements, and explore the different career opportunities available. We invite all aviation enthusiasts, professionals, and students to attend the Aero Expo and be a part of this exciting event. The Aero Expo is open to the public, and registration is free.

In conclusion, the Aero Expo at Flight: National Level Technical Symposium will be an exceptional opportunity for individuals interested in aviation and drone technology to learn, network, and witness the latest advancements in the industry. We are excited to host this event and look forward to welcoming you all to the Aero Expo on March 16<sup>th</sup> 2024, at Anna University, MIT Campus.
