FLIGHT'20

FEBRUARY 28, 2020

DAY 1 EVENTS:

FLIGHT SIMULATOR

Event description

The flight simulator event is where you will be allowed to have a hands-on experience of an aircraft's primary flight controls in a simulated environment. This event will be fun for the participants as well as a platform to show off their "simulated" flying skills. Also to add a little intensity to the event, the top few participants will be selected for a final round where the best of them will be rewarded.

The event will be conducted in a single premise where each participant will get a chance to experience the simulation. There will be a briefing prior the event. Each participant will be assigned a particular aircraft to complete the flight path provided by the event organisers. Timings will be noted and evaluations will be performed by the event organisers. Out of all the participants, a few best scores will be taken and those participants will be allowed to be in the competitive round where the winner will be chosen and rewarded.

Are you ready to tackle the nature in a simulation world? If you can, then come to MIT to show your piloting skills in the FLIGHT SIMULATOR.

Event format

- First round is prelims.
- In second round the user has to fly in the given simulated condition within the given time limit.

Rules

- Participants are required to produce college ID without fail.
- Judges decision will be final.
